

ABSTRACT

A method and system for tracking a plurality of actions against at least one object by a computer system is disclosed. The method and system comprises providing an output view, wherein the output view includes a first output area and a second output area. An action list containing each of the plurality of actions is displayed in one of the first and second output areas. A user is allowed to select one action from the action list, and information associated with the selected action is displayed in the other of the first and second output areas.
